

# ACME STAPLE FASTENERS

Ten good reasons and one more why every stationer should handle them

**THE ACME No. 1  
ONE OF OUR LEADING SELLERS**

The Acme Binder No. 1 is designed for work in small printing offices where the occasional job of Binding sent out takes away most of the profit of the job. The great points about this machine are its strength and simplicity. It holds 100 staples at a charge and binds to one-quarter in. It requires no adjusting at all. It is equipped with the anti-clogging device and flat table.

**SURE SHOT**

The old reliable machine still holds in favor, owing to its cheapness, considering the work done. It will bind any fabric to  $\frac{1}{4}$  inch. Holds 100 staples and has the same anti-clogging device as the other machines. There is no spring to raise the head, thereby lessening the blow necessary to drive the staple.

**BECAUSE**

They are constructed of the best material.

**BECAUSE**

They are put together by experienced men.

**BECAUSE**

They are attractively made and durable.

**BECAUSE**

They are simple and still very powerful.

They effect great saving in time and labor.

**BECAUSE**

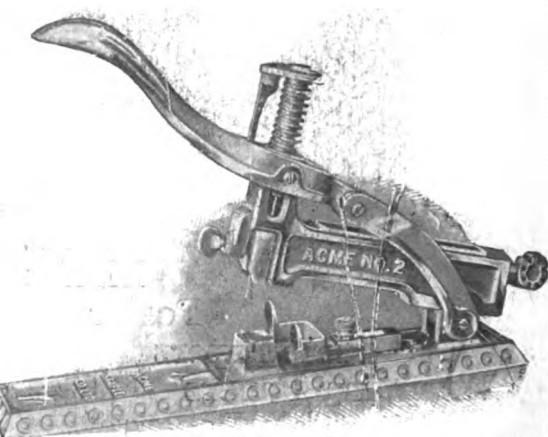

They are absolutely the best manufactured.

**BECAUSE**

The best is what your customers require.

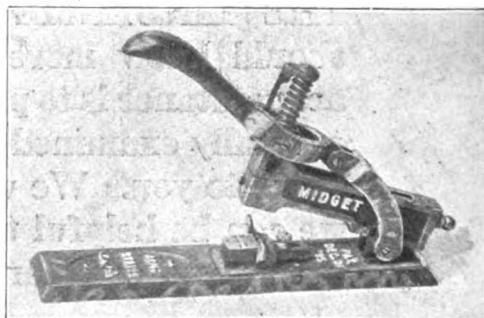

**BECAUSE**

They are profitable for you to handle.

**THE ACME No. 2  
ONE OF OUR BEST PRODUCTIONS  
Especially Adapted for Office Work**

Drives a broad, flat staple, which will hold without tearing the thinnest or penetrate the toughest and hardest papers. The best yet for filing papers, letters or vouchers, fastening payroll envelopes, backing statements, legal documents, etc. Always in position for use, as shown in cut. Handsomely nickelized. Holds 50 staples.

**THE MIDGET**

The "Midget" is designed for fastening papers and light fabrics together. It is largely used by insurance companies, lawyers, telephone exchanges, etc., for vouchers, policies, legal documents, etc., and by clothing, cloak and suit, straw braid, lace, neckwear, embroidery and other manufacturers and importers for the preparation of samples. Holds 100 tinned steel wire staples and is automatic in action.
